PRACTICAL 1

Creating a Business Website

Objective:

To understand the structure and design of a business website using HTML/CSS, including a responsive layout, navigation menu, images, and content sections.

TASKS
• Create a simple website homepage
• Add navigation menu, images, and content
• Design responsive layout

TOOLS USED
• HTML / CSS
• VS Code (Code Editor) (https://code.visualstudio.com)
• Wix Website Builder (https://www.wix.com)
• WordPress (https://wordpress.com)

Implementation – BrightMark Digital Solutions Website

A fully responsive business website was created for **BrightMark Digital Solutions**, a fictional digital marketing agency. The website includes a sticky navigation bar, hero section, services grid, statistics bar, about section, and contact section.

Website Structure:

- Navigation Menu: Logo + Links (Services, About, Contact) – sticky positioned
- Hero Section: Headline, sub-text, CTA button with gradient background
- Services Section: 6-card responsive grid (SEO, Social Media, Ads, Email, Analytics, Budget)
- Stats Bar: 500+ Clients, 98% Retention, 12K Campaigns, 8 Years Experience
- About Section: Company description paragraph
- Contact Section: Address, Phone, Email displayed
- Footer: Copyright line

HTML Snippet (Navigation):

```
<nav> <div class="logo">BrightMark</div> <ul> <li><a href="#services">Services</a></li> <li><a href="#about">About</a></li> <li><a href="#contact">Contact</a></li> </ul> </nav>
```

CSS Responsive Grid Snippet:

```
.service-grid { display: grid; grid-template-columns: repeat(auto-fit, minmax(240px, 1fr)); gap: 30px; }
```

Live Website Link: <https://brightmark-demo.netlify.app> (HTML file also attached as *BrightMark_Website.html*)

Website Property	Details
